FRAME FINISHES

Available in the following frame finishes:

Charcoal (05)
Chocolate (30)
Bronze (25)
Canyon Spice (26)
Pewter (44)

Please contact your sales representative to obtain a finish sample. Finishes can be perceived differently in photography.

MIG WELDED FRAMES
Frames aren’t bolted together, they’re welded. Because of the welding process we use, the final weld has more strength than the materials that it holds together.

E-COAT PRIMER SYSTEM
Frames are electrostatically primed, resulting in four times greater corrosion resistance and more uniform paint adhesion.

POWDER-COATED FINISH
Meadowcraft uses PPG e-coat and ultra-durable powders to insure durability and long lasting beauty.

GOT IT COVERED
E-coat primers are applied using a dip process, similar to that of the automotive industry, to ensure that every surface is primed to Meadowcraft’s exacting standards.

FURNITURE GLIDES
Each leg is capped with a metal foot, which holds a replaceable furniture glide to protect your outdoor surfaces.

FRAMES ARE CLEANED
Frames are cleaned to remove weld spatter with a hammer and chisel, and/ or hand grinders. The utmost care is taken to ensure that each product is beautifully made.
